

# Documentation

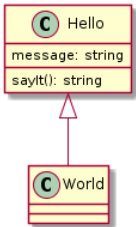

Nice project with a nice documentation

## History

date	author	message	changed chapters
12.5.17	Kolja Schönig	adding the copy to clipboard button for code blocks	<ul style="list-style-type: none"><li><a href="#">/Introduction/Special Features</a></li></ul>
22.2.17	stefan meyer	some simple changes	<ul style="list-style-type: none"><li><a href="#">/Introduction/Documentation</a></li></ul>

## 1 Introduction

This is a chapter intro text.

diagram

### 1.1 Documentation

This is the sub chapter "Documentation"

#### Images

image

#### Tables

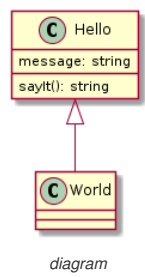

this	is a	table
a	b	c
a	b	c

#### Sourcecode

```
if (x==1) javascript.format("nicely");
```

Diagrams

You can integrate [plantuml](#) diagrams

1.2 Special Features

Callout

There are three different callouts : warning, danger and info.

```
> [[danger]] __headline__
> Here comes the important info
>
```

headline

Here comes the important info

Link to Chapter

```
[Link to Documentation](ref:/Introduction/Documentation)
```

[Link to Documentation](#)

Links are checked at generation time and broken links fail the generation.

Copy to Clipboard Button

Adding a copy to clipboard button by extending the language in a code by "jctc". All code inside the block will be copied. The button will appear while hovering over the code block.

```
this text will be copied to the clipboard
```
